Standard Training Program

Our Standard Training Program is a self-help program designed to provide effective training to operators. This program provides the operator with a series of self-help videos including a number of slide decks and manuals. Our programs work with you to deliver efficient training on PowerHandling machines and focuses on teaching best practices and mindful operating habits.

Our Standard Training Program is provided at no cost to you. PowerHandling also has availability for phone and video calls if operators need any additional aid after completing the Standard Training Program.

Below are some of the services provided in our Standard Training Program:

- ❖ **Video demonstrations**

- ❖ **Operator manuals and slide decks**

- ❖ **Over the phone or video call training**

Deliverable Results

PowerHandling's training programs work to support the effective training and performance of our equipment as well as providing better knowledge and understanding of machine use to operators.

Key takeaways from our Standard Training Program:

- ✓ **Identifying preoperational inspection procedures**

- ✓ **Identifying proper and improper operation**

- ✓ **Identifying common potential hazards**
